# 1/2" & 3/8" TURBOSOCKETS®

A division of **Snap-on**

Quickly and easily remove damaged or rounded nuts and bolts with these new Turbosocket® damaged fastener sockets. Just place these sockets on any damaged fastener and turn with a ratchet, breaker-bar or T-handle and the grip on the fastener tightens as more torque is applied.

No hammering is required to install the socket over the fastener and they can be used on all types of standard nuts and bolts as well as studs, corroded auto and marine fasteners and pipe nipples. These sockets can also be used for 'best fit' on metric and fractional fasteners and can be used with electric or air impact wrenches for more torque.
