## 800 LUMEN TACTICAL FLASHLIGHT

This high powered tactical LED flashlight features a rugged aluminum alloy body with an attached belt clip and lanyard. The Cree LED is a bright 800 lumens and will last up to 100,000 hours.

This light includes a rechargeable 3.7 volt x 3200 mAh Ultrafire® battery or can be powered with 3 AAA batteries in the included adapter. The kit also includes a 110 volt battery charger and a 12 volt cigarette lighter charger, so being able to charge and power this flashlight is never an issue.

The light beam is adjustable from narrow to wide or can be set to strobe and the end of the light housing features an emergency window breaker. It measures just 6-1/2" and is waterproof, shockproof and perfect for any indoor or outdoor professional or recreational use. (AAA batteries are not included.)

FL800

RECHARGEABLE 800 LUMEN FLASHLIGHT

## CLASS # 12

# 60 SMD LED WORK LIGHT

The Viper 'Lightning Bolt' cordless work light features new SMD, (surface mounted device), LED technology which mounts the LED's directly to a circuit board. The advantage of SMD LED's is that they are sturdier in design, smaller than LED's, (which allows for a larger array in a smaller area), and consume much less energy, allowing for longer life and longer burn time. They also have a much larger beam angle than LED's; 120° as opposed to 60° or 30°.

This work light is extremely bright and features 60 SMD LED's in a 4-1/2" x 1/2" array. The entire light is just 14" long and has a comfortable PVC grip with two swivel hooks so it can hang either horizontally or vertically. It also has a detachable magnet to hold it to any metallic surface. Full charge takes just 3 hours for 3-1/2 hours of run time and it's powered with a 3.7 volt Lithium-Ion battery.

VIPER LIGHTNING BOLT CORDLESS LIGHT

## CLASS # 12

# HEAVY DUTY CORD REEL

Made in the USA by Bayco<sup>®</sup>, these heavy duty, non-breakable cord reels are made of Delrin, a super tough Polymer by DuPont<sup>®</sup>. They feature a wide base for stability and an easy carry handle.

The large capacity spool will store 150' x 16/3 cord, 125' x 14/3 cord or 100' x 12/3 cord and can be used with either flat or round cords. (Extension cord is not included.)

Protects all power cords from dangerous tangles and kinks. Perfect for the job site or in the shop and there are large hanger holes in the frame making it easy to store reel out of the way. Can also be used for storing rope or wire.

**ITEM#:**

**DESCRIPTION:**

**K100**

**HEAVY DUTY CORD REEL**

# CLASS # 12

## TROUBLE LIGHTS

These are heavy duty round, metal cage trouble lights. They are UL listed and approved for commercial use. The cord is 16 gauge, round, blue 'SJT' type and resistant to mild chemicals and abrasion and will stay flexible in cold weather. Available in 25' or 50' and have one three prong female plug at the head.

### DELUXE DROP LIGHT REEL

Heavy duty American made, UL approved and listed. These are the pro models. They have an ABS molded, hard-shell casing with an oil resistant 18/3 SVTO cord. They are rated at 7 amps and 125 volts. Includes all mounting hardware. No auxiliary plug.

ITEM#:	SIZE:	DESCRIPTION:

## **CLASS # 12**

# **STUBBY RETRACTABLE FLUORESCENT WORK LIGHT**

This is a heavy duty UL approved American made light. It has a 20' x 18/2 pure copper cord. The bulb is rated for 10,000 hours. It is the equivalent of a 75 watt incandescent bulb. The bulb is a PL-13/41 twin tube fluorescent lamp and is encased in a clear Lexan tube for protection. Tube is 10" long.

There is a hanger hook on the end of the tube, so the light can be used hands free. The retractable unit comes with all mounting hardware to mount the reel on the wall or ceiling.

**ITEM#:**

**DESCRIPTION:**

**SL650**

**20' RETRACTABLE STUBBY FLUORESCENT LIGHT**

## CLASS # 12

# RETRACTABLE FLUORESCENT LIGHT

First off, these fluorescent work lights are the ones with a steel housing not the cheap plastic ones. They're bright yellow with a heavier 16/3 black cord, not the lightweight 18/3 cord. That's because they have the extra plug socket at the end of the light. And, these are UL and OSHA approved because that heavy duty switch is recessed and shock-proof.

You get a 10,000 hour twin-tube bulb that's equal to a 75 watt incandescent bulb. And, here's a great feature: on the end of the light is a clear end cap for spot lighting. Also, in the box, at no extra charge, is a magnetic holder that you can strap onto the light and mount it wherever you want. Sliding hook is included. USA made.

**ITEM#:**

**DESCRIPTION:**

**SL825**

**16/3 x 40' SJT FLUORESCENT REEL LIGHT**

## CLASS # 12

# FLUORESCENT 50' LIGHT REEL

This professional series 13 watt fluorescent work light features a 50' retractable pro grade cord reel with a smooth glide rewind. It has a chemical and oil resistant 50' 14/3 SJTA cord, 13 AMP circuit breaker in the plug and the brackets for mounting or wall hanging are included.

### Specifications:

- Cool Running 13w 10,000 Hour Rated Bulb
- Equivalent to 75W Incandescent
- Polarized plug with 12 Amp Grounded Receptacle
- Resettable 13 Amp Circuit Breaker

**ITEM#:**

**DESCRIPTION:**

**SL8907**

**BAYCO® 50' RETRACTABLE REEL LIGHT**

## **CLASS # 12**

### **18/2 50' FLUORESCENT REEL LIGHT**

First of all, these are solid steel cord housings - not the cheap plastic ones. They have a very smooth and quiet retracting motion - definitely built for longevity. The light bar is 12" overall length, including the built in ballast. They have the clear fluorescent bulb and a built-in light reflector.

They're UL listed, CSA certified, and made in the USA. and, the thing that guys like the most about these is that they're precision made and won't jam up on you.

**ITEM#:**

**DESCRIPTION:**

**SL826**

**18/2 50' FLUORESCENT REEL LIGHT**

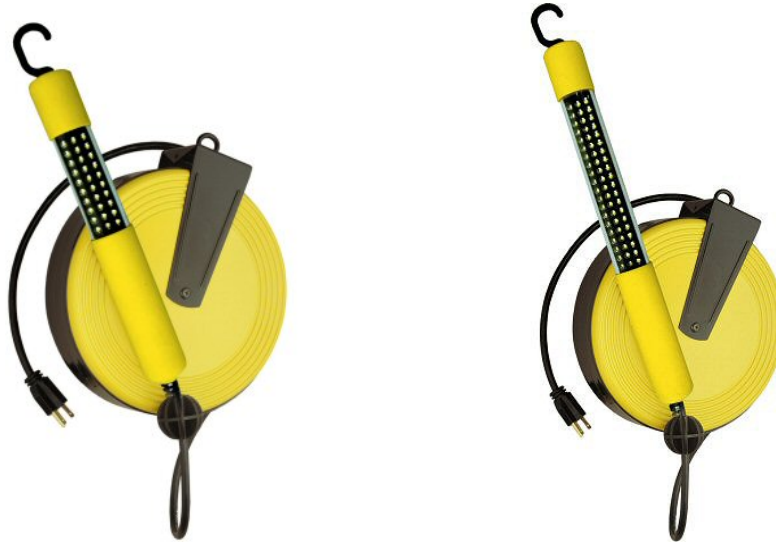

## CLASS # 12

# BAYCO LED LIGHT REELS

LED work lights are very cool to the touch, so the light doesn't heat up. LED stands for "Light Emitting Diode". LED lights are just tiny light bulbs in an array field, but they have no filaments to burn out, so there is no bulb replacement and, because they are a pure electrical light (illumination by movement of electrons in a semi-conductor material), the light is not diffused. It is spread evenly over the bulb area, even to the outer edges, there is no "hot spot".

These lights burn longer, cooler, whiter, and without bulb maintenance. Each LED bulb is rated to 70,000 hours (that's 6 hours of use per day, 300 days a year for 39 years), so the drop light may literally be the last one you buy. They are shatterproof so you get a five year limited element warranty.

These are **USA made by Bayco** and on 50' reels. We've got the "30 bright" which is brighter than most 75 watt bulbs, and the "60 bright", which have twice as many diodes in a larger array field.

**ITEM#:**

**DESCRIPTION:**

<b>SL2110</b>	<b>30 BRIGHT BAYCO 50' LED LIGHT REEL</b>
<b>SL2112</b>	<b>60 BRIGHT BAYCO 50' LED LIGHT REEL</b>

## CLASS # 12

# STUBBY FLUORESCENT WORK LIGHTS

These are American made, heavy duty, fluorescent drop lights. They have a yellow, 20' (or 50') 18 gauge 2 wire all copper cord that's thermo-insulated so it'll stay flexible in cold weather and still take years of abuse.

They feature long-life, 10,000 hour twin tube fluorescent bulbs that are rated the same as a 75 watt incandescent bulb. The bulb is encased in a high impact clear poly carbonate tube with a light reflector that focuses all the light without causing added heat.

But here's what makes this light handy to use: it's only 12" in length with a sliding hook, so you can hang it from either end or in the middle, hands free! The switch is the push on/off type that's right on the light. And, the ballast is built into the light tube, so you don't have a "black box" hanging off the plug.

ITEM#:	SIZE:	DESCRIPTION:

## CLASS # 12

# ANGLE FLOURESCENT DROP LIGHT

These are the new type fluorescent lights with the twin-tube bulb, so they are a lot brighter than the regular fluorescent tube type. They come with the 25' black SJT, 16 gauge, super flexible cord with a grounded, moulded-on plug.

The light itself is angled about 18° and has built-in magnetic strips so that you can attach the light at any angle to any metal surface. The light housing is tough ABS yellow plastic, with rubber bumpers top and bottom, and with a thick, shatterproof, clear Lexan lens.

There's an extra plug-in receptacle on the base and a swivel hook to hang it with. The switch is the heavy-duty rocker type that's recessed so you can't accidentally bump it off. Imported.

**ITEM#:**

**DESCRIPTION:**

## CLASS # 12

# FLUORESCENT CONVERT-A-LIGHT

These “convert-a-lights” allow you to turn your old drop lights into brand new fluorescent lights. Now, you don’t have to throw away broken “trouble” lights. Just cut the old light (incandescent or fluorescent) off that 16 gauge cord, and in just a minute, anyone can easily attach these new fluorescent light ends to the old cord.

They are 2” in diameter and 14-1/2” long, and made to take a beating in normal use. They have heavy duty rocker switches and an extra receptacle for plugging in other cords or tools. The 13 watt ballast is built right into the light. There’s also a convenient, sliding hanger that is double pronged for strength.

It’s an easy fix to an age-old problem. Each light comes with three crimp on terminals for do-it-yourself applications.

**ITEM#:**

## CLASS # 12

# 60 + 9 LED CORDLESS WORK LIGHT

This is a cordless work light that features 69 bright LED lights instead of standard incandescent or fluorescent bulbs. LED bulbs produce brighter light per watt than incandescent bulbs making it more efficient and less expensive in battery powered or energy saving devices.

The light emitted from an LED bulb is focused, where incandescent and fluorescent sources often require an external reflector to collect the light and direct it in a usable manner. A great feature on these work lights is that they have 60 LED bulbs on the side for use as a utility light and 9 LED's on the top so it can be used as a flashlight.

This light has a built in, 1800 mAh 3.6 volt rechargeable battery and will run for 7 to 7-1/2 hours on a single charge. They have a high impact housing with a rubber grip, and a swivel hanging hook. Included is a cigarette lighter adaptor and a UL/CUL charger. Imported.

**ITEM#:**

**DESCRIPTION:**

**AE134**

**60 + 9 LED CORDLESS WORK LIGHT**

# CLASS # 12

## 78 LED CORDLESS WORK LIGHT

This is a cordless work light that features 78 bright LED lights instead of standard incandescent or fluorescent bulbs. LED bulbs produce more light per watt than incandescent bulbs making it more efficient and less expensive in battery powered or energy saving devices.

The light emitted from an LED bulb is focused, where incandescent and fluorescent sources often require an external reflector to collect the light and direct it in a usable manner. A great feature on this work light is a brightness control which allows you to use at either half brightness or full brightness.

This work light has a rechargeable, long life 7.2 volt battery with a work time of 3 to 5 hours and a recharge time of 2 to 3 hours. It has a high impact housing, two swivel hanging hooks and an adjustable magnetic holder. The charger, which is a UL adapter, is included. IMPORTED

## CLASS # 12

# ADJUSTABLE LED HEAD LIGHT

A very handy and useful item for anyone needing a directional light while keeping both hands free for other things. This ultra bright, 9 LED head lamp uses 3 AAA batteries to power a strong beam of light right to a work source while securely and comfortably worn on the head. Can also be set to flash on and off for emergencies.

The attached head band is comfortable and fully adjustable and the entire unit is water resistant. Also great for hiking, biking, spelunking and camping and comes with 3 AAA batteries. Import.

***Homak* FLEX INSPECTION LIGHT**

This is the perfect flashlight for looking behind and around objects where light is needed. This inspection light from Homak® features a shock resistant anodized aluminum body with a water resistant 'O'-ring.

It can be bent into any shape for any direction and extends up to 32-3/4" long. Requires 2 AA batteries (not included). Import

ITEM#:	DESCRIPTION:
FL32	HOMAK® 32" FLEX INSPECTION LIGHT

## CLASS # 12

# MULTI-FUNCTION FLEX UTILITY LIGHT

This multi-function utility light features a 16” flexible neck that can be bent to any convenient position. It has an adjustable clamp so it can be fastened to a work bench, table, door or any other flat surface.

The neck detaches so it can be used as a regular flashlight and it comes with a snap-on magnetic holder so it can be attached to any metal object, with or without the flex neck. There is also a screw-on top that radiates the light outward and acts as a lantern, so it can be hung from a tent or canopy like a lantern.

Made of aircraft grade aluminum with a wrist lanyard and lifetime L.E.D.’s that never need replacing. Has a magnetic head so it can be used as a pickup tool and dual output levels for optimal brightness. Requires 2 ‘AA’ batteries (included).

- 6 Bright L.E.D.’s
- 20-30 Lumens Output
- High/Low Modes
- 10-20 Hours Runtime
- Magnetic Head
- 16” Flexible Neck
- Nylon Wrist Lanyard
- Dual Mode On/Off Switch

## **CLASS # 12**

# **HAND CRANK LED LANTERN**

Perfect in an emergency situation where no electricity or batteries are available, this lantern will illuminate a small area with just a few cranks of the convenient, fold out handle. Simply put; a permanent magnet spins next to a coil of wire. The magnetic field pushes the electrons around in the coil and produces electricity illuminating the LED's.

This lantern features 12, super bright LED lights that last up to 10,000 hours. It has 3 built in lighting modes; 4 LED power for low, 8 LED power for medium or 12 LED power for high. Great for camping, boats, garage or anywhere emergency light may be needed. Import.
